

MUHAMMAD UMAR FAROOQ

AI & Machine Learning Student | Agentic AI Developer

momerfarooq223@gmail.com | +92 328 6403551 | Lahore, Pakistan

[GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [LeetCode](#) | [Hugging Face](#) | [Kaggle](#)

PROFILE

BS Artificial Intelligence student (6th semester) at the University of Management & Technology, Lahore, maintaining a 3.81/4.00 CGPA on a 70% merit scholarship. Recognized with the **Dean's Award** (top 10% SGPA in the AI department) and **Rector's Award** (4.0 SGPA in a semester). Building production-grade autonomous agents, computer vision systems, NLP tools, cybersecurity assistants, and workflow automation with **18+** shipped projects including **9+** autonomous AI agents.

EDUCATION

University of Management & Technology (UMT), Lahore

Oct 2023 - Present

BS Artificial Intelligence | 6th Semester | CGPA: 3.81/4.00

- 70% Merit Scholarship awarded based on academic performance
- Dean's Award - top 10% SGPA in the AI department
- Rector's Award - 4.0 SGPA in a semester

Punjab Group of Colleges (PGC), Lahore

Sep 2021 - Jun 2023

FSc Pre-Medical | 970/1100 (88.2%) | 50% Merit Scholarship

Matric (Science)

Jun 2019 - Jun 2021

1085/1100 (98.6%) | Biology (A+), Chemistry (A+), Physics (A+)

PROFESSIONAL DEVELOPMENT

Panaversity - Agentic AI Program | Q1 (In Progress)

Jan 2026 - Present

Learning: Agentic AI, Claude Code, Tool Integration, MCP | Focus: foundational agentic patterns and advanced agent design

PROJECTS

Personal AI Employee

github.com/omerfarooq223/personal-ai-employee

Claude Code | Flask | Gmail API | Playwright | MCP-style tooling

- Built an autonomous human-in-the-loop assistant that monitors Gmail, reasons over incoming tasks, and prepares approval-ready actions.
- Connected real services through safe approval workflows, token-protected dashboard APIs, and reviewable automation outputs.

AutoGrader Agent

github.com/omerfarooq223/AutoGrader-Agent

Python | Groq/Gemini | PyMuPDF | openpyxl | JavaScript UI

- Built an AI grading system for assignment ZIPs with rubric generation, answer-key support, roster matching, and styled Excel reports.
- Added dual-similarity plagiarism checks, chunked grading for long submissions, viva question generation, retries, and test coverage.

FireWatch AI

github.com/omerfarooq223/Agentic-Fire-Detection

FastAPI | React | YOLOv8 | SQLite | RAG | Gmail API

- Developed a fire/smoke monitoring dashboard with video analysis, timeline metrics, safety guidance, and demo-safe alert workflows.
- Implemented backend zones, detections, incidents, optional YOLO weights, RAG-assisted response guidance, CI, and security documentation.

PhishGuard AI

github.com/omerfarooq223/PhishGuard-AI

FastAPI | Groq | Chrome Extension | React Dashboard

- Created a Gmail/Outlook Chrome extension that extracts open emails, analyzes phishing risk, and displays an in-page safety sidebar.
- Combined heuristic features, URL/domain signals, Groq LLM classification, scan history, and clear user recommendations.

CareerPilot Agent

github.com/omerfarooq223/CareerPilot-Agent

FastAPI | Groq | SQLite | GitHub API | MCP | GitHub Actions

- Developed an Observe-Analyze-Plan agent that audits GitHub projects, tracks role readiness, and saves week-over-week progress snapshots.
- Built a web dashboard and contextual chat interface for repository questions, skill execution, and career-improvement nudges.

SHAP-Explained Agentic IDS

github.com/omerfarooq223/shap-agentic-ids

Python | Flask | React | SHAP | LangGraph | Security ML

- Built a hybrid intrusion detection platform combining ML detection, SHAP explanations, LangGraph reasoning, and SOC-style alerting.
- Added role-aware dashboards, forensic chat, threat-intelligence context, and autonomous red-team stress testing concepts.

Parking Detection System

github.com/omerfarooq223/parking-detection-system

YOLOv8 | Gradio | OpenCV | Hugging Face API | DBSCAN

- Built image/video parking analysis that detects occupied and free spaces, ranks the best open spots, and supports entrance-aware scoring.
- Added zone overlays, adjustable thresholds, aggressive mode, and a parking assistant chatbot with rule-based fallback.

AutoResearch Agent

github.com/omerfarooq223/autoresearch-agent

Python | Groq | Tavily | PDF generation

- Built an autonomous research agent that searches sources, synthesizes findings, and generates professional PDF reports.
- Automated repeatable report generation with structured sections, source gathering, and export-ready formatting.

Jira-Slack Integration

github.com/omerfarooq223/n8n-jira-slack

n8n | Jira | Slack | REST APIs | OpenRouter

- Implemented production-oriented n8n workflows for Slack slash commands, Jira issue creation, status updates, and sprint summaries.
- Used environment-based configuration, validation checks, runbooks, and modular workflow JSONs for safer import and reuse.

EXPERIENCE

UMT - Peer Tutoring

Mar 2025 - Jul 2025

Academic Tutor | Lahore, Pakistan

- Tutored peers across AI and programming subjects, helping students grasp complex concepts through adaptive teaching methods.
- Strengthened communication, mentoring, and leadership skills by translating technical ideas into clear learning steps.

Customer Services & Operations Roles

Feb 2024 - Jan 2025

Remote & Lahore, Pakistan

- Shopify Store (Nov 2024 - Jan 2025): resolved customer inquiries, handled orders/returns, and managed shipment updates.
- SMZ Dispatch (Feb 2024 - Apr 2024): coordinated with US-based clients, improving cross-cultural communication and reliability.
- Grasp Solutions (Jun 2024 - Sep 2024): managed high-volume client interactions and taxi-dispatch coordination under time pressure.

TECHNICAL SKILLS

AI & ML: LLM Integration (Groq, Gemini, LLaMA) | Agentic AI Architecture | Multi-agent Patterns | Machine Learning | Computer Vision (OpenCV, YOLO) | NLP | SHAP | Scikit-learn

Languages & Frameworks: Python (Advanced) | C++ | SQL | HTML/CSS/JavaScript | FastAPI | Flask | React/Vite

Tools: n8n Workflow Automation | Git/GitHub | PyMuPDF | openpyxl | python-docx | Jupyter | Docker | Postman | VS Code

ADDITIONAL

Languages: Urdu (Native) | English (Advanced) | Turkish (Basic)

Profiles: GitHub | LinkedIn | LeetCode | Hugging Face | Kaggle

Interests: Competitive programming | Open-source AI projects | Agentic AI development | Applied cybersecurity
